Pardeep Kumar

Enterprise Software Architect

16+ years designing and building high-volume billing, charging and supply-chain systems, now delivering them AI-native and cloud-native, and using AI to make engineering teams measurably faster.

Pune, India pradeepalhan@gmail.com **pradeepalhan.github.io** linkedin.com/in/pardeep-kumar-74549517

ENGINEERING	TECHNOLOGY	DOMAIN	LEADERSHIP
60%	Native by design	3	16+ yrs
faster payment jobs	**SaaS-native · Agile · AI-native · High-performance**	**telecom · supply chain · automotive**	**building and leading teams**
one of several 50%+ runtime cuts across systems	RAG & agentic AI · CI/CD · JVM/IMDG tuning	Bell Canada · Korea Telecom · 60+ global clients	Developer → Team Lead → Architect

CAREER HIGHLIGHTS

Millions saved, no new hardware
Drove the Wallet, which added charging capacity on existing infrastructure. Amdocs

Waterfall to Scrum
Led a team of 8 senior engineers through an Agile transformation. Amdocs

#1 of 60+ teams
Won the company-wide TechShift AI Hackathon. Mphasis

Live tuning for Korea Telecom
Tuned a production charging system from JVM and data grid down to the hypervisor. Amdocs

9 days to 4
Automated end-of-cycle billing for Bell Canada, XLcom and Telkomcel. Amdocs

80% lower development cost
Delivered an automotive signal-processing system through AI-led development. PeopleTech

EXPERIENCE

Mphasis · Lead System Architect — Nov 2025 – Present · Pune

Leading architecture and delivery for a telecom billing transformation, bringing AI into both the product and the way the team builds it.

- Built new platforms from the ground up for bill presentment and bill quality checks, taking them from idea to client demos and acceptance testing.
- Made payment processing markedly faster and automated the team's operational documentation.

PeopleTech Group · Technical Lead — Feb 2024 – Nov 2024 · Hyderabad

Led the architecture redesign of an in-car display system for a leading North American client, making it more resilient and faster, and delivered a companion system using AI-led development.

Blue Yonder · Lead Software Engineer — Sep 2020 – Dec 2023 · Bengaluru

Built and ran core parts of a cloud supply-chain platform that plans store fulfilment and replenishment every day for a large retail network.

- Designed how multi-pack products are handled, cutting manual work and improving order accuracy.
- Kept the platform reliable across client environments, working closely with supply-chain and modelling experts.

Amdocs · Developer → Team Lead → Specialist — Aug 2010 – Mar 2020 · Pune

Nearly ten years on the charging and billing systems telecom operators run their business on, for 60+ operators including Bell Canada and Korea Telecom.

- Grew from developer to team lead, leading charging teams and setting up a product team in India for a billing tool used by 60+ clients.
- Moved bills from static PDFs to interactive online formats, and supported live charging for leading APAC operators.

SKILLS

Solution architecture · High-volume transactions · Distributed systems · Performance tuning · JVM GC & IMDG · C++ · C · Python · RAG · Agentic AI · Agile · Scrum · Spec-driven dev · Azure · Docker · Dask · GitHub Actions · CI/CD · QNX · AUTOSAR · Test automation · Product ownership

EDUCATION

B.Tech, Computer Engineering
NIT Kurukshetra · 2006–2010

Class XII (CBSE) · 76%
Kendriya Vidyalaya, AFS Bidar

Class X (CBSE) · 86%
Kendriya Vidyalaya, AFS Bidar

RECOGNITION

- Recognised for technical contributions and client delivery
- Led voter-registration drive: 10,000+ registrations
- Selected for KV National Sports Meet, volleyball

BEYOND WORK

Triathlons, BRMs and marathons; motorcycling and trekking. YCB Level 2 certified yoga teacher (trained at Kaivalyadhama); taught at NKBA Badminton Academy.
