Pardeep Kumar

Enterprise Software Architect

16+ years designing and building high-volume billing, charging and supply-chain systems, now delivering them AI-native and cloud-native, and using AI to make engineering teams measurably faster.

ENGINEERING	TECHNOLOGY	DOMAIN	LEADERSHIP
60%	Native by design	3	16+ yrs
faster payment jobs	**SaaS-native · Agile · AI-native · High-performance**	**telecom · supply chain · automotive**	**building and leading teams**
one of several 50%+ runtime cuts across systems	RAG & agentic AI · CI/CD · JVM/IMDG tuning	Bell Canada · Korea Telecom · 60+ global clients	Developer → Team Lead → Architect

CAREER HIGHLIGHTS

- A core telecom charging system was running short of capacity under high-volume traffic, and the usual answer was more hardware. I drove the design of a stateless Wallet service to take that load off the core engine and led 8 senior engineers to deliver it, **adding capacity on existing infrastructure and saving millions**. Amdocs
- The same team was shipping in long waterfall cycles, where problems surfaced late. I led its move to Agile and ran Scrum for the 8 senior developers, so **work shipped in short, reviewable increments**. Amdocs
- Korea Telecom's live charging system needed performance tuning in production, where every change carries risk. I tuned it end to end, from JVM garbage collection in the in-memory data grid down to the hypervisor, **improving a live operator's performance**. Amdocs
- End-of-cycle billing implementations for Bell Canada, XLcom and Telkomcel took nine days of largely manual effort. I led their automation and **brought the effort down to four days**. Amdocs
- Building a cross-platform signal-processing system for an automotive client the conventional way would have been slow and costly. I delivered it through AI-led development at **80% lower development cost**. PeopleTech
- Against 60+ teams in TechShift, a company-wide AI hackathon, my AI solution **placed first**. Mphasis

EXPERIENCE

Mphasis · Lead System Architect — Nov 2025 – Present · Pune

Leading architecture and delivery for a telecom billing transformation, bringing AI into both the product and the way the team builds it.

- Built new platforms from the ground up for bill presentment and bill quality checks, taking them from idea to client demos and acceptance testing.
- Made payment processing markedly faster and automated the team's operational documentation.

PeopleTech Group · Technical Lead — Feb 2024 – Nov 2024 · Hyderabad

Led the architecture redesign of an in-car display system for a leading North American client, making it more resilient and faster, and delivered a companion system using AI-led development.

Blue Yonder · Lead Software Engineer — Sep 2020 – Dec 2023 · Bengaluru

Built and ran core parts of a cloud supply-chain platform that plans store fulfilment and replenishment every day for a large retail network.

- Designed how multi-pack products are handled, cutting manual work and improving order accuracy.
- Kept the platform reliable across client environments, working closely with supply-chain and modelling experts.

Amdocs · Developer → Team Lead → Specialist — Aug 2010 – Mar 2020 · Pune

Nearly ten years on the charging and billing systems telecom operators run their business on, for 60+ operators including Bell Canada and Korea Telecom.

- Grew from developer to team lead, leading charging teams and setting up a product team in India for a billing tool used by 60+ clients.
- Moved bills from static PDFs to interactive online formats.

SKILLS

Solution architecture · **High-volume transactions** · **Distributed systems** · **Performance tuning** · **JVM GC & IMDG** · **C++ · C · Python** · **RAG** · **Agentic AI** · **Agile · Scrum** · **Spec-driven dev** · **Azure · Docker · Dask** · **GitHub Actions · CI/CD** · **QNX · AUTOSAR** · **Test automation** · **Product ownership**

EDUCATION

B.Tech, Computer Engineering
NIT Kurukshetra · 2006–2010

Class XII (CBSE) · 76%
Kendriya Vidyalaya, AFS Bidar

Class X (CBSE) · 86%
Kendriya Vidyalaya, AFS Bidar

RECOGNITION

- **Multiple spot and recognition awards** at Amdocs and Mphasis
- Selected for KV National Sports Meet, volleyball

BEYOND WORK

Triathlons, BRMs and marathons; motorcycling and trekking. YCB Level 2 certified yoga teacher (trained at Kaivalyadhama); taught at NKBA Badminton Academy.
