Pardeep Kumar

Enterprise Software Architect

16+ years designing and building high-volume billing, charging and supply-chain systems, now delivering them AI-native and cloud-native, and using AI to make engineering teams measurably faster.

Pune, India pradeepalhan@gmail.com **pradeepalhan.github.io** linkedin.com/in/pardeep-kumar-74549517

ENGINEERING	TECHNOLOGY	DOMAIN	LEADERSHIP
60%	Native by design	3	16+ yrs
faster payment jobs	**SaaS-native · Agile · AI-native · High-performance**	**telecom · supply chain · automotive**	**engineer → architect**
Wallet: millions saved · repeated 50%+ runtime cuts	RAG & agentic AI · CI/CD · JVM/IMDG tuning	Bell Canada · Korea Telecom · 60+ global clients	Led 8 senior engineers · built a team in India

WHAT I BRING

An architect who stays hands-on: I work with business and technology leaders to shape the problem, then design and build the system that solves it.

→ Problem to production
Take a loosely defined business problem to a running system: discovery, architecture, build and rollout, owned end to end.

→ Boardroom to codebase
Frame options and trade-offs for leadership, then prove them with prototypes, demos and production code.

→ Domain-first design
Telecom charging & billing, supply chain, automotive: architecture that starts from how the business actually runs.

→ Modern by default
SaaS-native, agile, AI-native and high-performance from day one, not retrofitted later.

→ Robust at scale
Low-latency, highly available systems that run every day: real-time charging, bill presentment, retail replenishment.

→ Teams that ship
Lead and grow engineering teams: moved 8 senior engineers from waterfall to Scrum; set up a team in India.

EXPERIENCE

Mphasis · Lead System Architect
Nov 2025 – Present · Pune

Architecting telecom billing transformation with AI built into the product and the engineering workflow.

- Built AI-native platforms from scratch: **RAG over production code**, AI-assisted bill QA taken to UAT, and bill presentment with **90%+** format matching.
- Cut payment-job runtimes by **60%**; automated runbooks across every active version.

PeopleTech Group · Technical Lead
Feb 2024 – Nov 2024 · Hyderabad

Re-architected an AUTOSAR-aligned automotive HMI for a leading North American client, with cross-platform modules on QNX and Windows; AI-led DSP development cut cost by **80%**.

Blue Yonder · Lead Software Engineer
Sep 2020 – Dec 2023 · Bengaluru

Built and ran core pieces of a cloud supply-chain platform: store fulfilment and replenishment running daily for a large retail network.

- Engineered a Dockerized, **Dask-driven fulfilment engine** (C++, Python, batch on Azure) and C++ demand-density processing in **Luminate**.
- Designed the **multipack SKU algorithm**, reducing manual intervention and improving order accuracy.
- Kept it healthy across client environments: GitHub Actions CI/CD, runtime and root-cause analysis with domain and modelling experts.

Amdocs · Developer → Team Lead → Specialist
Aug 2010 – Mar 2020 · Pune

A decade in real-time charging and billing for 60+ operators, including Bell Canada and Korea Telecom.

- Drove the stateless **Wallet**: more charging capacity on existing hardware, **saving millions**; led 8 senior engineers and moved the team from waterfall to Scrum.
- Tuned live charging for Korea Telecom from JVM/IMDG to hypervisor; automated EOC billing (**9 → 4 days**); set up and led a product team in India serving 60+ clients.

SKILLS

Solution architecture · **High-volume transactions** · **Distributed systems** · **Performance tuning** · **JVM GC & IMDG** · **C++ · C · Python** · **RAG** · **Agentic AI** · **Agile · Scrum** · **Spec-driven dev** · **Azure · Docker · Dask** · **GitHub Actions · CI/CD** · **QNX · AUTOSAR** · **Test automation** · **Product ownership**

EDUCATION

B.Tech, Computer Engineering
NIT Kurukshetra · 2006–2010

Class XII (CBSE) · 76%
Kendriya Vidyalaya, AFS Bidar

Class X (CBSE) · 86%
Kendriya Vidyalaya, AFS Bidar

RECOGNITION

- **1st of 60+ teams**, TechShift AI Hackathon
- Recognised for technical contributions and client delivery
- Led voter-registration drive: 10,000+ registrations
- Selected for KV National Sports Meet, volleyball

BEYOND WORK

Triathlons, BRMs and marathons; motorcycling and trekking. YCB Level 2 certified yoga teacher (trained at Kaivalyadhama); taught at NKBA Badminton Academy.
