Pardeep Kumar

Enterprise Software Architect

16+ years designing and building high-volume billing, charging and supply-chain systems, now delivering them AI-native and cloud-native, and using AI to make engineering teams measurably faster.

Pune, India pradeepalhan@gmail.com **pradeepalhan.github.io** linkedin.com/in/pardeep-kumar-74549517

ENGINEERING	TECHNOLOGY	DOMAIN	LEADERSHIP
60%	#1 of 60+	3	16+ yrs
faster payment jobs	**teams, TechShift AI Hackathon**	**telecom · supply chain · automotive**	**engineer → architect**
Wallet: millions saved · repeated 50%+ runtime cuts	80% lower dev cost via AI · RAG · agentic AI	Bell Canada · Korea Telecom · 60+ global clients	Led 8 senior engineers · built a team in India

EXPERIENCE

Mphasis · Lead System Architect

Nov 2025 – Present · Pune

- **Performance:** cut payment-job runtimes by 60% with AI-assisted design, development and testing.
- **Runbook automation:** runbooks for every job generated, updated and maintained automatically across all active versions.
- **AI & RAG:** built retrieval-augmented generation over production codebases and applied it to engineering workflows.
- **Quality engineering:** built an AI-assisted QA platform for rule-based bill-PDF validation, taken to UAT readiness with CI/CD.
- **Bill presentment:** built bill-format replication with pixel-level comparison; 90%+ matching in feasibility demos.

Yoga & self-discovery — *Nov 2024 – Nov 2025*

PeopleTech Group · Technical Lead

Feb 2024 – Nov 2024 · Hyderabad

- Re-architected an automotive HMI application for a leading North American client, aligned with AUTOSAR, improving resilience and performance.
- Built a multi-screen brightness-control module running on both QNX and Windows.
- Built a cross-platform DSP system through AI-led development, cutting development cost by 80%.

Triathlon training & racing — *Dec 2023 – Feb 2024*

Blue Yonder · Lead Software Engineer

Sep 2020 – Dec 2023 · Bengaluru

- Developed a Dockerized, Dask-driven store-fulfilment engine (C++, Python, batch on Azure) for a large retail network.
- Designed the multipack SKU algorithm, reducing manual intervention and improving order accuracy.
- Engineered C++ demand-density processing in Luminate; resolved production issues through runtime and root-cause analysis.
- Automated build and test with GitHub Actions across multiple client environments.

Amdocs · Software Engineering & Technical Leadership

Aug 2010 – Mar 2020 · Pune

Software Developer → Senior Software Developer → Team Lead → Software Development Specialist

- **Wallet:** drove the creation of a stateless Wallet service that took high-volume events off the core charging engine, adding capacity on existing hardware and saving millions; led eight senior engineers.
- Tuned live charging for Korea Telecom: JVM GC tuning of the IMDG layer plus hypervisor-level diagnostics and tuning.
- Technical specialist on Turbo Charging (C++ real-time charging); earlier led a team of four on new charging features.
- Established and led a five-developer team in India for Amdocs Document Designer; modernised build and release; owned the lifecycle for 60+ global clients.
- Led EOC billing automation for Bell Canada, XLcom and Telkomcel; cut EOC billing implementation from nine days to four.
- Designed a web-service contract-management system for telecom retail; moved bills from static PDF to interactive online formats.

HOW I BUILD

AI-NATIVE
RAG over production code, AI-assisted QA, AI-led development.

CLOUD-NATIVE
Docker, Dask and Azure; CI/CD with GitHub Actions.

SAAS
Blue Yonder Luminate across client environments; Amdocs products for 60+ clients.

SKILLS

Solution architecture · **High-volume transactions** · **Distributed systems** · **Performance tuning** · **JVM GC & IMDG** · **C++ · C · Python** · **RAG** · **Agentic AI** · **Spec-driven dev** · **Azure · Docker · Dask** · **GitHub Actions · CI/CD** · **QNX · AUTOSAR** · **Test automation** · **Product ownership**

EDUCATION

B.Tech, Computer Engineering
NIT Kurukshetra · 2006–2010

Class XII (CBSE) · 76%
Kendriya Vidyalaya, AFS Bidar

Class X (CBSE) · 86%
Kendriya Vidyalaya, AFS Bidar

RECOGNITION

- **1st of 60+ teams**, TechShift AI Hackathon
- Recognised for technical contributions and client delivery
- Led voter-registration drive: 10,000+ registrations
- Selected for KV National Sports Meet, volleyball

BEYOND WORK

Triathlete, runner and cyclist. Yoga practitioner and teacher (NKBA Badminton Academy; studied at Kaivalyadhama).
